

# DVD Review: Justice League: Crisis on Two Earths

POSTED BY KIMBERLY LYNN WORKMAN ON SEPTEMBER - 24 - 2010

Lex Luthor and The Joker working together for evil? I can get behind that. What might be harder to swallow is Lex Luthor and The Jester (alternate Joker) working for the good of man, but that's just what we have in [Justice League: Crisis on Two Earths](#). The good Luthor came from an alternate universe asking for help. It seems that, in his world, Lex is the good guy and the Crime Syndicate has taken over with their brand of evil.

It was fascinating to see the alternate versions of the well-known good guys. Superwoman, Owlman, Johnny Quick, Ultraman, Power Ring, and more show us what can happen when good guys go bad. With the threat of nuclear war hanging over this world and Owlman's Quantum Eigenstate Device (QED) nearing completion, it's a fight to see if either side will win before they're both blown to bits.

But then again, why destroy one world when you can destroy more?

There are infinite universes out there and Owlman seeks to end them all. That's the ultimate threat the the Justice League must fight against or else they'll have no home to return to. Of course the good guys win, but it's a fun ride to the conclusion!

I've always enjoyed seeing how alternate universes are different than our own. When you take iconic heroes and flip them, that's bound to be ultimately interesting. The voice cast alone is enough to carry you through. With the likes of William Baldwin (Batman), Mark Harmon (Superman), Chris Noth (Lex Luthor), Gina Torres (Superwoman), James Woods (Owlman), and many more you may find yourself saying "hey, isn't that?" more than once. I was constantly entertained.
